## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at [www.edexcel.com](http://www.edexcel.com) or [www.btec.co.uk](http://www.btec.co.uk). Alternatively, you can get in touch with us using the details on our contact us page at [www.edexcel.com/contactus](http://www.edexcel.com/contactus).

## **Pearson: helping people progress, everywhere**

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

## General marking guidance

These notes offer general guidance, but the specific notes for examiners appertaining to individual questions take precedence.

- 1 All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first.

Where some judgement is required, mark schemes will provide the principles by which marks will be awarded; exemplification/indicative content will not be exhaustive. When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the response should be sent to review.

- 2 All the marks on the mark scheme are designed to be awarded; mark schemes should be applied positively. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

**Questions where working is not required:** In general, the correct answer should be given full marks.

**Questions that specifically require working:** In general, candidates who do not show working on this type of question will get no marks – full details will be given in the mark scheme for each individual question.

- 3 **Crossed out work**

This should be marked **unless** the candidate has replaced it with an alternative response.

- 4 **Choice of method**

If there is a choice of methods shown, mark the method that leads to the answer given on the answer line.

If no answer appears on the answer line, mark both methods **then award the lower number of marks.**

- 5 **Incorrect method**

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review for your Team Leader to check.

- 6 **Follow through marks**

Follow through marks which involve a single stage calculation can be awarded without working as you can check the answer, but if ambiguous do not award.

Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

**7 Ignoring subsequent work**

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question or its context. (eg. an incorrectly cancelled fraction when the unsimplified fraction would gain full marks).

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect (eg. incorrect algebraic simplification).

**8 Probability**

Probability answers must be given as a fraction, percentage or decimal. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).

Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.

If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

**9 Linear equations**

Unless indicated otherwise in the mark scheme, full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously identified in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded (embedded answers).

**10 Range of answers**

Unless otherwise stated, when an answer is given as a range (e.g 3.5 – 4.2) then this is inclusive of the end points (e.g 3.5, 4.2) and all numbers within the range.

**11 Number in brackets after a calculation**

Where there is a number in brackets after a calculation E.g.  $2 \times 6 (= 12)$  then the mark can be awarded **either** for the correct method, implied by the calculation **or** for the correct answer to the calculation.

**12 Use of inverted commas**

Some numbers in the mark scheme will appear inside inverted commas E.g. “12”  $\times$  50 ; the number in inverted commas cannot be any number – it must come from a correct method or process but the candidate may make an arithmetic error in their working.

**13 Word in square brackets**

Where a word is used in square brackets E.g. [area]  $\times$  1.5 : the value used for [area] does **not** have to come from a correct method or process but is the value that the candidate believes is the area. If there are any constraints on the value that can be used, details will be given in the mark scheme.

**14 Misread**

If a candidate misreads a number from the question. Eg. uses 252 instead of 255; method or process marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review.

### Guidance on the use of abbreviations within this mark scheme

<b>M</b>	method mark awarded for a correct method or partial method
<b>P</b>	process mark awarded for a correct process as part of a problem solving question
<b>A</b>	accuracy mark (awarded after a correct method or process; if no method or process is seen then full marks for the question are implied but see individual mark schemes for more details)
<b>C</b>	communication mark
<b>B</b>	unconditional accuracy mark (no method needed)
<b>oe</b>	or equivalent
<b>cao</b>	correct answer only
<b>ft</b>	follow through (when appropriate as per mark scheme)
<b>sc</b>	special case
<b>dep</b>	dependent (on a previous mark)
<b>indep</b>	independent
<b>awrt</b>	answer which rounds to
<b>isw</b>	ignore subsequent working

Question	Answer	Mark	Mark scheme	Additional guidance
1 (a)	$\frac{95}{28}$	M1	for a method to add using common denominators with at least one fraction correct (matching numerator with common denominator) eg $\frac{60}{28} + \frac{35}{28}$ <b>or</b> (2) $\frac{4}{28} + (1)\frac{7}{28}$	Use of decimals gets no credit unless it leads to a correct fraction
(b)	$1\frac{3}{5}$	M1	for $\frac{6}{5} \times \frac{4}{3}$ <b>or</b> $\frac{24}{20} \div \frac{15}{20}$ <b>or</b> $\frac{8}{5}$ oe eg $1\frac{9}{15}$	Use of decimals gets no credit unless it leads to a correct fraction
		A1	cao	
2	140	P1	for beginning to solve the problem eg $50 \div 5 \times 8 (= 80)$ <b>or</b> $14 : 8 : 5$ oe <b>or</b> $14 : 8$ and $8 : 5$ oe (linked)	80 may be seen in the ratio 80 : 50
		P1	for a full process to solve the problem eg “80” $\div 4 \times 7$ <b>or</b> $\frac{50}{5} \times “14”$ <b>or</b> $140 : 80 : 50$	
		A1	cao	If 140 clearly identified as houses in working award full marks

Question	Answer	Mark	Mark scheme	Additional guidance
3	30	P1	for full process to find the number of bags sold eg $5 \times 1000 \div 250 (= 20)$  <b>OR</b> for process to find selling price of 1 kg of sweets eg $0.65 \times 4 (= 2.60)$	This could be by repeated addition  Calculations can be in £ or pence
		P1	for [number of bags] $\times 0.65$ <b>or</b> “20” $\times 0.65 (= 13)$ <b>or</b> “2.60” $\times 5 (= 13)$	[number of bags] can only come from
			<b>OR</b> for $10 \div “20”$ oe (= 0.50)	$5 \times 10 \div 250 (= 0.2)$
			<b>OR</b> for $0.65 \times 4 (= 2.60)$ <b>and</b> $10 \div 5 (= 2)$	or $5 \times 100 \div 250 (= 2)$
			<b>OR</b> for $0.65 \times 4 (= 2.60)$ <b>and</b> $10 \div 5 (= 2)$	or $5 \div 250 (= 0.02)$
		P1	(dep on previous P1) for a process to find the percentage profit eg (“13” $- 10$ ) $\div 10 \times 100$ <b>or</b> $(0.65 - “0.50”) \div “0.50” \times 100$ <b>or</b> (“2.60” $- “2”) \div “2” \times 100$	3/10 or 0.3 is not enough but should be awarded 2 marks
			<b>OR</b> “13” $\div 10 \times 100 (= 130)$ oe	Award P3 for 130(%)
		A1	cao

4 (a)	Estimated value	P1	for using a rounded value in a correct process eg $3000 \div 15$ <b>or</b> $15 \times 8$ <b>or</b> $20 \times 8$	Their rounded value must be used in a calculation  Rounding may appear after a correct process eg $15.12 \times 8 = 120.96 \approx 100$ followed by eg $3069.25 \div 100$
		P1	for a full process to find the number of days eg “3000” $\div$ “15” $\div$ “10” (= 20) <b>or</b> “3000” $\div$ “15” $\div$ 8 (= 25)	Accept $3069.25 \div 15.12 \div 8$ oe
(b)	Explanation	A1	for a correct answer following through their rounded values	
		C1	eg less days required <b>or</b> it doesn't affect the answer because I would still round 16.27 down to 15 (or up to 20)	Refers to time taken

5	(a)	isosceles triangle, base 6 cm, height 4 cm	M1	for drawing an isosceles triangle <b>or</b> for drawing a triangle of base 6cm and height 4cm	Accept a freehand drawing Only a single triangle is acceptable; do <b>not</b> accept any attempted nets or 3-D diagrams  Condone a perpendicular drawn from base to vertex
			A1	for a fully correct diagram	
	(b)	96 cm <sup>2</sup>	M1	for a method to find the area of a triangular face eg $\frac{1}{2} \times 6 \times 5 (= 15)$	Ignore incorrect or absent units for this mark [The SC is from: $4 \times \frac{1}{2} \times 6 \times 4 + 6 \times 6$ ]  Ignore incorrect or absent numerical answer for this mark
			M1	(dep) for finding the total surface area eg $4 \times "15" + 6 \times 6$	
			A1	for a numerical answer of 96  SC B1 for an answer of 84 if M0 scored	
		B1	cm <sup>2</sup>

10 (a)	Box plot drawn	B3	for a fully correct box plot	Condone the lack of a vertical marker at the end of the tails  Note that a box must be present, as must "tails"
		(B2	for at least 3 correctly plotted values including box and whiskers/tails )	
		(B1	for at least 2 correctly plotted values including box or whiskers/tails or 5 correct values plotted or clearly identified and no box or whiskers/tails )	
(b)	60	M1	for a method to find $\frac{3}{4}$ of 80 eg $20 + 20 + 20$ or $\frac{3}{4} \times 80$	
		A1	cao	
11	$90 - 2x$	M1	for identifying an unknown angle eg $BAO = x$ , $AOB = 180 - 2x$ , $OBC = 90$ , $ABC = 90 + x$	Could be shown on the diagram alone  Needs to be an algebraic method Accept $x + x + 90 + y = 180$ for M2  Underlined words need to be shown; reasons need to be linked to their method; any reasons not linked do not credit.  Apply the above criteria
		M1	full method to find the required angle eg a method leading to $180 - x - x - 90$	
		A1	for $90 - 2x$	
		C2	(dep M2) full reasons for their method, from base angles in an <u>isosceles triangle</u> are equal <u>angles</u> in a <u>triangle</u> add up to $180^\circ$ a <u>tangent</u> to a circle is perpendicular to the <u>radius (diameter)</u> <u>angles</u> on a straight <u>line</u> equal $180^\circ$ the <u>exterior angle</u> of a triangle is <u>equal</u> to the sum of the <u>interior opposite angles</u>

## Modifications to the mark scheme for Modified Large Print (MLP) papers.

Only mark scheme amendments are shown where the enlargement or modification of the paper requires a change in the mark scheme.

The following tolerances should be accepted on marking MLP papers, unless otherwise stated below:

Angles:  $\pm 5^\circ$

Measurements of length:  $\pm 5$  mm

Question	Modification	Mark scheme notes
5	(a) Model and a diagram provided. Diagram enlarged. Dashed lines made longer and thicker. Dotted lines made more obvious. Question reversed: Four different options of the front view of the pyramid have been provided. The pyramid has been put on page one for question 23(a) and the four shapes labelled A to D have been put on page two for question 23(a). Question changed to 'Look at the model or at the diagrams for Question 23(a) in the Diagram Book. They are shown on two pages in the Diagram Book. Page one shows a solid square-based pyramid, VABCD. The base of the pyramid is a square of side 6 cm. The height of the pyramid is 4 cm. M is the midpoint of BC and $VM = 5$ cm. Page two for Question 23 shows four shapes, labelled A, B, C and D. Each square represents a one centimetre square. Which shape shows the accurate front elevation of the pyramid from the direction of the arrow?' [See below for diagram]	Award 1 mark for an answer of D Award 2 marks for an answer of C NB: Accept any other unambiguous indication of the answer such the diagram indicated by circling etc.
