

# QT Similar Shapes (Area & Volume)

1. Cylinder  $x$  and cylinder  $y$  are mathematically similar.

The ratio of the surface area of cylinder  $x$  to the surface area of cylinder  $y$  is  $1 : 4$

(a) Simon says

'The height of cylinder  $x$  is one quarter of the height of cylinder  $y$ .

Explain why Simon is wrong

.....

.....

..... (1 mark)

(b) The volume of cylinder  $y$  is  $95\text{cm}^3$ . Calculate the volume of cylinder  $x$ .

(3 marks)

## QT Similar Shapes (Area & Volume)

2. Prism A and prism B are mathematically similar.

The ratio of the surface area of prism A to the surface area of prism B is 4 : 9

The volume of prism B is  $405\text{cm}^3$

Show that the volume of prism A is  $120\text{cm}^3$

(3 marks)

3. Three solid shapes  $x$ ,  $y$  and  $z$  are mathematically similar.

The surface area of shape  $x$  is  $4\text{cm}^2$

The surface area of shape  $y$  is  $25\text{cm}^2$

The ratio of the volume of shape  $y$  to the volume of shape  $z$  is 27 : 64

Work out the ratio of the length of shape  $x$  to the length of shape  $z$

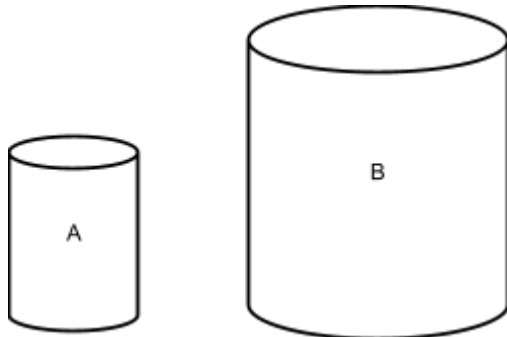

Give your answer in its simplest form.

(4 marks)

# QT Similar Shapes (Area & Volume)

4. Two solid cylinders. A and B, are mathematically similar.

Cylinder A has a radius 4cm.

Cylinder B has a radius 10cm.

The surface area of cylinder A is  $60\text{cm}^2$

(a) Work out the surface area of cylinder B

(2 marks)

The volume of cylinder B is  $800\text{cm}^3$

(b) Work out the volume of cylinder A

(2 marks)

## QT Similar Shapes (Area & Volume)

5. A motorhome has a volume of  $12\text{m}^3$

Ahmed makes a model of this motorhome using a scale of  $1 : 72$

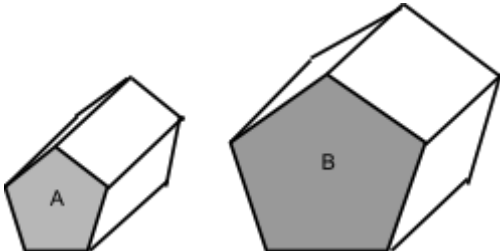

Work out the volume of the motorhome model, giving your answer in  $\text{cm}^3$

(4 marks)

6. Prism A and prism B are mathematically similar.

The cross sections are shaded.

Area of the cross section of A : area of the cross section of B =  $4 : 9$

Prism A has a volume of  $240\text{cm}^3$ .

Prism B has a length of  $15\text{cm}$ .

Work out the area of the cross section of prism B.
